# Community Subscription

Astronomical Society of the Pacific Conference Series

## ■ ■ ■ **NEW online e-subscription**

**This exclusive offer is for non-research and community institutions.**

Your institution can now access the Astronomical Society of the Pacific Conference Series (ASPCS) proceedings online for \$399 per year—much lower than the regular subscription price.

## ■ ■ ■ **E-access to all Conference Series volumes**

The new community subscription offers electronic access to more than 445 published ASPCS volumes from 1988 to the present.

## ■ ■ ■ RESEARCH

### **Access cutting-edge astronomy research.**

The community subscription makes the latest astronomy and astrophysics breakthroughs available to a broad audience, including undergraduate students, amateur astronomers, and other interested members of your community.

## ■ ■ ■ Did you know...

Last year we reported 375,000 visits to our website from 195 countries.

## ■ ■ ■ EDUCATION

### **Get access to a dynamic educational tool.**

Conference Series volumes provide fresh and up-to-date information for astronomy educators.

Read about the interesting and new teaching techniques in astronomy.

Quickly find new and relevant astronomy information for students from the world's top professionals.

## ■ ■ ■ Did you know...

### **Recent ASPCS titles of interest to astronomy educators:**

- Volume 431: *Science Education and Outreach*
- Volume 436: *Learning from Inquiry and Practice*
- Volume 433: *Library Information Services*
- Volume 441: *The Inspiration of Astronomical Phenomena*

## ■ ■ ■ ACCESS

### **Access the full catalog of 445+ volumes electronically.**

Electronic subscriptions give online researchers instant access to articles through IP authentication.

## ■ ■ ■ Did you know...

With your e-subscription, you can quickly access over 30,000 articles going all the way back to 1988.

## ■ ■ ■ KEY BENEFIT

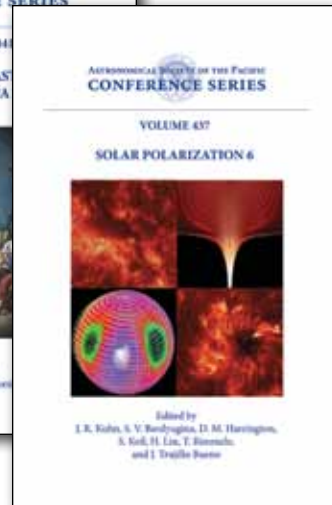

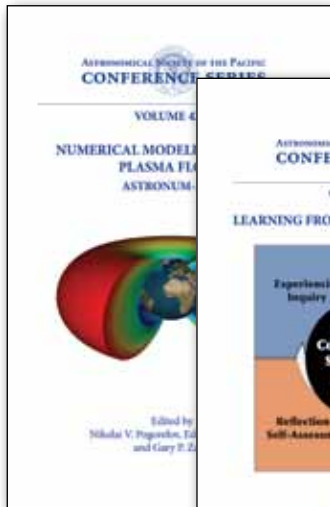

**Your annual Community Subscription is significantly less expensive than a regular print subscription.**

## ■ ■ ■ Did you know...

The ASPCS and Publications of the Astronomical Society of the Pacific (PASP) were among the top 10 sources cited by professional astronomers in 2009. *(Michael Kurtz)*

## RECENT VOLUMES

## ■ ■ ■ About the ASP Conference Series

Since 1988, the Astronomy Society of the Pacific (ASP) has published the renowned Conference Series as part of its century-old mission to advance the science of astronomy.

The ASP Conference Series has published over 445 volumes touching upon all aspects of astronomy, astrophysics, and astronomy education.

The ASP remains dedicated to bringing the latest results from meetings held all over the world to the astronomical community as rapidly and economically as possible, offering:

- Library and institutional subscriptions
- Individual purchases of articles and/or books
- e-book access to subscribers and purchasers

A recent study conducted by an independent publisher found that each article in the top astronomical journals references ASP Conference Series articles on average two to three times per paper.

## ■ ■ ■ **About the Astronomical Society of the Pacific**

The Astronomical Society of the Pacific (ASP) was founded in 1889 by a group of northern California professional and amateur astronomers after they joined together to view a rare total solar eclipse.

The ASP's earliest purpose was to disseminate astronomical information—a mission which has flourished with astronomers' inexhaustible exploration of the universe.

The ASP has become the largest general astronomy society in the world, with members from over 70 nations. The ASP is composed of members from the astronomical, educational, and amateur astronomy communities.

The ASP increases the understanding and appreciation of astronomy by engaging scientists, educators, enthusiasts and the public to advance science and science literacy.
